Key D:

D, A, Bm, G

Key E:

E, B, C#m, A

Key F:

F, C, Dm, A#

Key G:

G, D, Em, C

Guitar Lesson Overview

Here is perhaps the MOST common chord progression in popular music. It is a simple 1-5-6-4 progression that I am sure you have heard a million times. It's really fun to play with these chords I show you in the video.

These are great sounding chords in themselves, and putting together this way makes them very easy to play. The names of the chords may sound advanced, but they are really easy to play chords, since it's mostly a matter of sliding your left hand up the neck, and only moving a finger here and there.
